THARUN K V

AI/ML ENGINEER | SOFTWARE ENGINEER

Bengaluru, India | tharunkv742004@gmail.com | +91 8277487233 | tharunkv.netlify.app | linkedin.com/in/tharun-kv | github.com/Tharun-Kv

SUMMARY

Final-year B.Tech (AI & ML) student and recent AI/ML Engineering Intern at Dview, with hands-on experience building production AI content pipelines, test automation, and voice-AI features using Python, Fast API, and LLMs. AWS Certified, with strong full-stack development experience across Python, JavaScript/TypeScript, and cloud infrastructure (AWS, S3/CloudFront). Seeking full-time AI/ML Engineer or Software Engineer roles.

EDUCATION

GITAM University, Bengaluru Campus — *Bengaluru, India*
BTech in Artificial Intelligence & Machine Learning
Class of 2026 · CGPA: 7.7 / 10

Mandavya Excellence PU College, Mandya — *June 2020 – July 2022*
PUC (PCMB) · Percentage: 91%

RK Educational Institution, Maddur — *June 2019 – May 2020*
SSLC · Percentage: 93.94%

EXPERIENCE

Dview — AI/ML Engineering Intern — *May 2026 – September 2026*
dview.io · Bengaluru, India

- Engineered dview-blog-generator, an end-to-end AI content pipeline (Python, FastAPI, OpenAI/Gemini API, Sanity CMS) automating SEO topic discovery, blog generation, and competitor analysis via RSS feeds and RAKE NLP keyword extraction
- Refactored the pipeline into a layered, production-grade architecture (DAO/DTO services, enums, centralized constants, structured logging) per tech-lead code review, and implemented blog versioning (Published → Under Revision → Published) with Alembic-driven schema migrations
- Built and enforced 16 automated editorial quality checks (passive voice, SEO keyword density, repetition detection) and a review UI for approval workflows and AI-generated thumbnails
- Implemented domain-restricted Google OAuth (@dview.io) with JWT/session-based authentication and session-scoped audit logging for editorial actions
- Designed a voice-cloning/narration pipeline (Whisper, Chatterbox TTS, FFmpeg) replacing AI narration in videos with natural cloned voices, deployed via AWS S3/CloudFront
- Contributed to the dview-ui codebase (Next.js, TypeScript, Sanity CMS), including CMS schema deployment workflows and brand asset design

PROJECTS

Visual Aid Learning Platform

- Built an accessibility-focused learning platform using OCR to extract diagrams and equations from STEM content, paired with Text-to-Speech conversion to support visually impaired learners

Smart E-Commerce Website

- Developed a React-based e-commerce frontend with product comparison across price, performance, and features, using Firebase authentication and modular, reusable components

BTech Capstone — Hybrid Metaheuristic Optimization for Secure IoT Data Migration in Fog Computing

- Led a hybrid optimization approach (SCCSO, SCPSO, Grey Wolf Optimizer, Federated Learning) using iFogSim2 and Java; authored a 40+ page academic paper and built a Chart.js performance dashboard

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java

AI/ML & Backend: Fast API, Google Gemini API, OpenAI API, LLM/Prompt Engineering, RAKE NLP, Chatterbox TTS, Whisper

Frontend: Next.js, React, Alpine.js, Jinja, Three.js, Chart.js

Data & Infrastructure: PostgreSQL, Sanity CMS, Alembic, AWS.

Testing & Tools: Git, OAuth/JWT

CERTIFICATIONS

- AWS Certification
- BCG – GenAI Job Simulation, Forage (July 2025)

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025 — Finalist
- Biomed Bharat 2024 — Runner-up
